The geographic restriction does not apply to portable computers provided that the five Workstation limit is not exceeded.
- 1.6 "Multi-User License" as used herein shall mean permitted use of Font Software on a specifically agreed number of static or portable Workstations located at a single or multiple geographic locations that adequately covers your current and/or future anticipated use of the Font Software for whatever font product or combination of font products is/are being purchased.

2. GRANT OF LICENSE AND SCOPE OF USAGE RIGHTS

- 2.1 In return for the license fee paid, you are hereby granted a non-exclusive, non-assignable, non-transferable (except as expressly permitted herein) fixed use license to access, use or store the Font Software on up to a maximum of five (5) Workstations, whether networked or not, only for your own Personal or Internal Business Use subject to the terms and conditions of this Agreement.
- 2.2 You have no rights to the Font Software other than as expressly set forth in this Agreement.
- 2.3 You agree that Fontworks owns all right, title and interest in and to the Font Software, its structure, organisation, code, and related files, including all property rights therein such as copyright, design and trademark rights. You agree that the Font Software, its structure, organisation, code, and related files are valuable property of Fontworks and that any intentional Use of the Font Software not expressly permitted by this Agreement constitutes a theft of valuable property. All rights not expressly granted in this Agreement are expressly reserved to Fontworks.
- 2.4 You may not use the Font Software for any purpose that is not permitted by this fixed use license subject to the terms and conditions of this Agreement. You agree not to use the Font Software for any other purpose without a separate license from Fontworks authorising you to do so (please refer to Additional License Options).
- 2.5 You may install and Use the Font Software on a single file server for Use on a single local area network ("LAN") only when the Use of such Font Software is limited to five (5) Workstations including the server.
- 2.6 You may take a digitised copy of the Font Software used for a particular document, to a commercial printer or service bureau for use by the printer or service bureau to fulfil the production and printing requirements of such document but only if the printer or service bureau represents to you that it has purchased or been granted a license to use that particular Font Software (unless otherwise advised).
- 2.7 Font Software may not be installed or Used on a server that can be accessed via the Internet or other external network system or by Workstations that are not covered by this five (5) Workstation license.
- 2.8 You may make one back-up copy of Font Software for archival purposes only, and you shall ensure that you retain exclusive custody and control over such copy. Upon termination of this Agreement, you must destroy the original and any and all copies of the Font Software.
- 2.9 You agree to establish reasonable procedures to restrict access to and use of the Font Software, trade names and trademarks to comply with the terms and conditions of this Agreement.

3. EMBEDDING RIGHTS

- 3.1 You may embed Font Software into pdfs, presentations, data files and other electronic documents as a static graphic image (a rasterized representation of the Font Software e.g. a GIF or JPEG) or as a subset of the Font Software provided that such embedded Font Software can only be viewed and printed (not edited, altered, enhanced or modified) and is solely for Personal or Internal Business Use. "Subsetting" should be used as far as possible to minimise the number of characters being embedded. You may also electronically distribute pdfs, presentations, data files and other electronic documents containing such embedded Font Software, providing that it is not part of a Commercial Product and providing that it is distributed in a secure format that prevents the Font Software from being extracted for any other purpose. Some sources don't support this, please check with Fontworks for further advice.
- 3.2 If you want to create documents or files that permit embedded Font Software to be edited or modified in any way, a separate license agreement is required that is subject to an additional charge.
- 3.3 If you want to embed the Font Software in a Commercial Product, a separate license agreement is required that is subject to an additional charge. Please contact Fontworks for details of additional Font Software Embedding Licenses.

4. MULTI-USER LICENSING

- 4.1 If you need to use or store Font Software on more than five (5) Workstations you will need to purchase an appropriate Multi-User License.
- 4.2 When determining the number of Workstations to be licensed, you must include all Workstations that might have access to or might store the Font Software at any point in time. The number must include concurrent and non concurrent use. If the Font Software is stored on a server that is attached to a Local Area Network (LAN) or a Wide Area Network (WAN), every Workstation and server that has access to the Font Software or stores the Font Software must be included in the multi-user license number to ensure that every Workstation and server is properly licensed.
- 4.3 You should review the number of workstations that have access to the Font Software on a regular basis to ensure that your Multi-User License continues to provide a sufficient level of cover. For the purpose of determining the proper number of Workstations for which a Multi-User License is needed, the following example is supplied for illustration purposes only: if there are one hundred (100) Workstations (including servers) connected together as part of a network, with no more than fifteen (15) Workstations or servers ever using or storing the Font Software concurrently, but the Font Software will be accessed or used on up to twenty-five (25) different Workstations (including servers) at various points in time, a Multi-User License must be obtained for twenty-five (25) Workstations. Unless secure IT procedures and controls are employed to restrict access to Font Software it is often a better solution to license all connected Workstations and servers that have access to Font Software at any point in time to circumvent the need for additional IT administration, controls and procedures.

- 4.4 Please contact Fontworks or a Fontworks authorised distributor or retailer if you think that a 5-User License is insufficient to meet your needs. An appropriate Multi-User License can then be calculated and provided.

IMPORTANT NOTE: please retain your purchase invoice or receipt as a record of proof of purchase of a Multi-User or other License. Most foundries and supply sources no longer provide any form of license certification and the invoice or receipt is therefore used for license details. Some license documents might be available on request, please contact Fontworks

Please contact Fontworks for details.
